**$500,000,000 OF RESEARCH HELPED CLIFF SHAW PLAY BASEBALL AT AGE 85.**

In November 1973, Cliff Shaw was stricken with cancer.

Fortunately, it was detected early enough. And with surgery, Cliff was able to continue living a healthy, active life.

There was a time when such a diagnosis was virtually hopeless.

But today, cancer is being beaten. Over the years, we've spent $500,000,000 in research. And we've made great strides against many forms of cancer.

With early detection and treatment, the survival rate for colon and rectal cancer can be as high as 75%. Hodgkin's disease, as high as 74%. Breast cancer, as high as 90%.

Today, one out of two people who get cancer gets well.
It's a whole new ball game.

**DURABLE Cage Cards**

**Save Time & Money**

New cage cards are strong, durable and impervious to water, mildew, rot and most chemicals.

Opaque white to enhance scanning, the cards cannot be torn or chewed by lab animals.

Developed in conjunction with General Computer Systems, the cards fit most cages and will work with ANY computerized recordkeeping system.
